ARKO PARAFFIN WAX

ARKO Paraffin Wax is a white to off-white crystalline purified mixture of solid hydrocarbons derived from petroleum. It is used in the manufacture of cosmetics, pharmaceuticals, food products, candle formulations, crayons, etc.

Typical Specifications :

Sr No.	Parameters	Test Method	Specifications		
			Fully Refined Paraffin Wax	Semi-Refined Paraffin Wax	Refined Paraffin Wax
1	Appearance	Visual	A white (extra white) solid mass	A white solid mass	A white to pale yellow solid mass
2	Colour	ASTM D 156	min. + 30	min. + 25	min. + 20
3	Odour	—	Odourless		
4	Melting point	ASTM D 87	58.0 – 65.0 °C		
5	Oil content, mass %	ASTM D 721	< 0.5	< 1.0	< 2.0
6	Needle penetration at 25 °C, 0.1 mm	ASTM D 1321	10 – 20		
7	Flash point, °C	ASTM D 92	min. 220		
8	Kinematic viscosity at 100 °C	ASTM D 445	4.0 – 5.0 cSt		
9	Sulphated ash		< 0.05%		
10	Polycyclic aromatic hydrocarbons	BP / USP	Complies		

PACKING: 30Kgs, 50 Kgs
